Agreement ☐ was reached. ☒ was not reached.

Claim(s) discussed: 25

Identification of prior art discussed:

Tower, MacGregor, Schatz

Description of the general nature of what was agreed to if an agreement was reached, or any other comments:

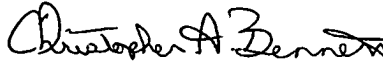

Applicants' counsel discussed the differences between the stents of Tower and MacGregor and the stent of of Schatz, i.e. that the first two are made of wire, and the third is made from a solid tube. Mr. Nagy expressed his belief that there would be no motivation to combine the teachings of Tower and MacGregor with the teachings of Schatz. Mr. Nagy further submitted proposed amendments to the claims to further define the invention over the prior art, including the limitation that some of the U-shaped members project outwardly when the rings are expanded. The Examiner indicated that this limitation in combination with the other recited elements is not taught by the prior art of reference. The Examiner further indicated that he would need to conduct further search on the proposed combination of recited elements. Mr. Nagy noted that he would be submitting two prior art references which are relevant to the claimed invention.

(A fuller description, if necessary, and a copy of the amendments, if available, which the examiner agreed would render the claims allowable must be attached. Also, where no copy of the amendments which would render the claims allowable is available, a summary thereof must be attached.)

1. ☐ It is not necessary for applicant to provide a separate record of the substance of the interview.
